

SHREE BANARASI SAREES

Referral System & Banarasi Coins -- Comprehensive QA Testing Checklist

Testing Setup Instructions:

User A (Referrer): Logged in with unique code. | User B (Referee): Friend (New customer / phone).

PHASE 1: Referral Link Capture & 30-Day Storage

#	Test Scenario	Steps to Execute	Expected Result	Result
1.1	Link Click (?ref=)	Friend clicks store link: https://yourstore.com/?ref=YOUR_CODE	URL cleans automatically. Cookie sbs_ref_code & localStorage save YOUR_CODE for 30 days.	☐ PASS
1.2	Case Normalization	Friend opens link with lowercase code: ?ref=sbs-xxxxx	Code is automatically normalized and saved in clean uppercase: SBS-XXXXX.	☐ PASS
1.3	Tab & Visit Return	Friend closes browser, browses products, returns to checkout later	Referral code is automatically loaded from cookie and prefilled in checkout.	☐ PASS
1.4	Manual Checkout Entry	Friend visits checkout without link and types YOUR_CODE in Referral Box	Validates with green check and badge: "Referred by [Your Name]".	☐ PASS

PHASE 2: Order Tier Slabs & Price Breakdown at Checkout

#	Test Scenario	Steps to Execute	Expected Result	Result
2.1	Below Tier 1 (< Rs 1,500)	Friend adds a saree worth Rs 1,200 and applies referral code	Badge: "Referred by [Name] - Add Rs 300 more for discount". Referral discount = Rs 0.	☐ PASS
2.2	Tier 1 (Rs 1,500 - 3,999)	Friend cart subtotal is Rs 2,500 with referral code	Discount: -Rs 150 off. Price breakdown shows "Referral Discount: -Rs 150". Total = Rs 2,350.	☐ PASS
2.3	Tier 2 (Rs 4,000 - 8,999)	Friend cart subtotal is Rs 5,000 with referral code	Discount: -Rs 300 off. Price breakdown shows "Referral Discount: -Rs 300". Total = Rs 4,700.	☐ PASS
2.4	Tier 3 (>= Rs 9,000)	Friend cart subtotal is Rs 10,000 with referral code	Discount: -Rs 500 off. Price breakdown shows "Referral Discount: -Rs 500". Total = Rs 9,500.	☐ PASS
2.5	Dynamic Quantity Change	Start at Rs 5,000 (Tier 2, Rs 300 off), reduce quantity to Rs 2,500	Discount dynamically drops from Rs 300 to Rs 150 in the price breakdown.	☐ PASS
2.6	Remove Referral Code	Click "Remove" next to applied referral badge	Badge removed, discount line removed, Grand Total resets to full subtotal, cookie cleared.	☐ PASS

PHASE 3: Anti-Fraud & Security Checks (Must Reject)

#	Test Scenario	Steps to Execute	Expected Result	Result
---	---------------	------------------	-----------------	--------

3.1	Self-Referral (Logged In)	You (User A) log in and enter your own referral code at checkout	Blocked immediately with error: "You cannot use your own referral code."	☐ PASS
3.2	Self-Referral (Incognito)	You open Incognito as guest, enter your code and your own phone number	create-order backend rejects self-referral via phone matching; sets discount to Rs 0.	☐ PASS
3.3	Repeat Customer (Logged In)	Customer who has already placed an order enters referral code	Blocked with error: "Referral codes are only valid on your first order."	☐ PASS
3.4	Repeat Customer (Guest Phone)	Customer places guest order using a phone number with prior orders	create-order checks prior phone orders in DB; blocks referral discount.	☐ PASS
3.5	Invalid Referral Code	Type a non-existent code (e.g. FAKE123)	Shows red error: "Invalid referral code. Please check and try again."	☐ PASS

PHASE 4: Order Creation & Database Ledger Verification

#	Test Scenario	Steps to Execute	Expected Result	Result
4.1	Place Qualifying Order	Friend places order with code via COD or Online (e.g. Rs 5,000)	Order confirms at Rs 4,700. In DB orders table: referral_code="CODE", referral_discount=300.	☐ PASS
4.2	Referrer Pending Ledger	Inspect DB coin_transactions and user_wallets for Referrer (User A)	coin_transactions has amount=300, status=PENDING. user_wallets.pending_balance increases by 300.	☐ PASS
4.3	Invoice PDF Breakdown	Click "Download Invoice" from order confirmation or account	Under Subtotal, explicit line: "REFERRAL DISCOUNT (CODE): - Rs 300.00". Total Paid matches.	☐ PASS

PHASE 5: Delivery & 7-Day Return Window Maturation

#	Test Scenario	Steps to Execute	Expected Result	Result
5.1	Admin Marks Delivered	In Admin Dashboard, update order status from shipped to delivered	Order updates. coin_transactions sets expires_at = Now + 7 Days. Status remains PENDING.	☐ PASS
5.2	Return Window Expiry	7 days pass (or set expires_at <= NOW() in DB to simulate expiry)	Transaction turns to COMPLETED. Referrers pending_balance shifts to available_balance (+300).	☐ PASS

PHASE 6: Cancellation & Return Protections (Money Back & Void)

#	Test Scenario	Steps to Execute	Expected Result	Result
6.1	Cancel Qualifying Order	Order with referral reward is cancelled/returned before return window	Referrers pending transaction marked CANCELLED. pending_balance decrements back by 300.	☐ PASS
6.2	Cancel Order with Coins	Order with 200 Banarasi Coins redeemed is cancelled	ORDER_CANCELLED_REFUND logged for +200 coins. Customers available_balance refunded +200.	☐ PASS

PHASE 7: Spending Banarasi Coins on Next Order

#	Test Scenario	Steps to Execute	Expected Result	Result
#	Test Scenario	Steps to Execute	Expected Result	Result
7.1	Min Order Threshold	Referrer has 300 coins; adds saree worth Rs 1,200 (< Rs 1,999 min)	Coins box indicates: "Available on orders above Rs 1,999".	☐ PASS
7.2	Max 20% Redemption Cap	Referrer adds saree of Rs 2,500 (20% cap = Rs 500); has 300 coins	Allows full 300 coins redemption (300 <= 500). Deducts Rs 300 from payable total.	☐ PASS
7.3	Redemption Ledger	Referrer places order redeeming 300 coins	available_balance decreases by 300. ORDER_REDEMPTION logged. Invoice prints coins deduction.	☐ PASS
